About V-Empower

V-Empower Inc. is a firm driven by the mantra of "Usability & Customer focus". The company has its own full-fledged development center with the state-of-the-art infrastructure. V-Empower from its inception has been successfully providing solutions, products and services across a broad range of technologies like : Application Security Consulting, Software Development, Application Consulting, Web Services, E-Commerce Solutions, E-Citizen Relationship Management tools, Staffing, Training, and Outsourcing.

V-Empower Solutions Private Limited, a wholly owned subsidiary of V-Empower Inc. a software company, headquartered in Maryland, United States, is in the process of achieving the Software Engineering Institute's (SEI) Capability Maturity Model Integration (CMMI) Level 3 rating for System Engineering and Software Engineering. It is also worth mentioning here that a few months back the company achieved another milestone in the form of ISO 9001:2000 certification. This shows that the group has established effective, well-defined processes and procedures in project management and software development.

Such feats also demonstrate V-Empower's level of commitment to excellence in system engineering, software development, and delivery. It also reiterates the fact that the company has tremendous potential in adopting creative approach to solving problems and accepting the principles of continual improvement.

Application Security Consulting

V-Empower's forte is Application Security Consulting. Our quality service and impenetrable security applications have given us a global clientele spread across America, Asia, and Europe. Our expertise in Application Security Solutions ensures that the key application security and privacy parameters are adequately met. To meet this end our consultants carry out exclusive "end-to-end" reviews of your e-business applications. After all, to give you the best deal is what we yearn for.

We provide security services in the following areas:

- Host Security
- Secure Programming Development
- Application Code Review
- Training Services
- Infrastructure Audit Services

We have also created an Application Security Assurance Program (ASAP) to resolve potential security and privacy vulnerabilities in the LOB applications. With the help of our security consultants we deliver this complete security assurance program that enables your organization to develop lasting security strategies and protect business critical information and assets.

Application Consulting

V-Empower has a team of expert Application Consultants to assist you in implementing different applications. Our consultants facilitate business process review sessions, provides input to Project Managers, provides training that is related to implementation and utilization of applications within the operational structure of the customer's organization, prepares project status/trip reports, follows up with customers on application issues, and coordinates with third party software providers, and most importantly, serves as a resource to other initiatives by contributing to product and business.

Software Development

When it comes to software development, V-Empower Solutions Private Limited is an experienced player. We use industry standard tools and methodologies in the software development cycle. Software is designed by using Object Oriented Analysis and Design (OOAD) and Unified Modeling Language (UML). Strenuous processes envelope the process of software development and the whole system is developed, iteratively tested and implemented before moving to the next iteration.

Areas of Business:

Software or Application Engineering, Application Reengineering & Migration, Application Maintenance, and Project Management.

Web Services

V-Empower Solutions Private Limited is considered a master in the domain of providing Web Presence Strategies. In fact, Web services are one of our earliest domains of concentration and expertise.

The company offers an array of strategies to different clients to make their web presence more competitive.

We are committed to make our clients' website a big success and we continuously work towards it.

Areas of Business:

Web Redesigning Framework, Web Branding, Search Engine Optimization, Online Research, Content Development, and E-Marketing.

Staffing

V-Empower delivers staffing needs across a multifaceted industry sector. Our competitive edge lies in our interest and willingness to invest significant time with organizations so that we can understand their needs and commit dedicated resources to deliver high quality results. In fact, our parent company V-Empower Inc. is the preferred software vendor for consulting and staffing services of Microsoft.

Our staffing solutions include:

- Permanent Staffing - Database Selection, Advertisement recruitment, and Turnkey recruitment services.
- Contract Staffing
